

Corrigendum

Mutations in the segment polarity genes *wingless* and *porcupine* impair secretion of the wingless protein

by Marcel van den Heuvel,
Cynthia Harriman-Samos, John Klingensmith,
Norbert Perrimon and Roel Nusse

The EMBO Journal, 12, 5293–5302, 1993

In the above paper, the restriction map shown in Figure 1A acquired an insert during the assembly of the figure, showing *wingless* as having seven exons rather than five. The authors apologize for this error, which does not affect the conclusions of the paper and thank Dr Jagat K.Roy, Department of Zoology, Banaras Hindu University, India, for alerting us to this mistake. A correct version of the map is shown below.

A
